FOR IMMEDIATE RELEASE

WLANmall Leaps Into Top 10 of Security Dealer & Integrator (SD&I) FAST50

Company ranks in top 10 of fastest-growing security dealers/integrators in North America; growth driven in part by mobile platform solutions and new customers in law enforcement and municipalities

Los Angeles, April 14, 2015 – **WLANmall,** a leading supplier of IP video, wired and wireless connectivity solutions announced that they placed in the Top 10 of the prestigious **SD&I Fast50**, a list of fastest growing security dealers and integrators in North America. WLANmall, ranked 28th on last year's SD&I FAST 50, specializes in offering technically advanced, cost efficient wired and wireless IP surveillance networks for enterprises, municipalities, law enforcement agencies and education. The company has seen a dramatic increase this year in interest from customers who want to monitor IP cameras over various mobile clients, multi-site distributed systems and IP access control with tight integration in to their Video Management Software (VMS).

SD&I's Fast50 program is considered the industry's premier best practices and ranking program that recognizes the fastest-growing security resellers across the entire landscape of security systems contracting, from alarm dealers and installers to systems integrators. The rankings are calculated using a balance of percentage growth and revenue growth over a three-year-period.

"WLANmall is honored to again be recognized by SD&I, alongside other impressive companies in the security industry, and we are thrilled to be ranked in the Top 10 this year," said Ronen Isaac, vice president of WLANmall. "This award validates our core principles to a two-prong growth strategy: building our customer base in new areas—including local law enforcement for both covert and overt surveillance—and providing comprehensive and optimal security and surveillance solutions with the excellent service and support that our existing customers have come to expect."

Since 2006, WLANmall has been delivering end-to-end IP surveillance network solutions, including wireless access points and bridges, IP cameras, video management software (VMS), servers, storage

networks and more, from top vendors including Milestone Systems, Sony, Axis, Cambium, Exalt, Radwin, Dell and Brocade.

About WLANmall

WLANmall, offers end-to-end, best-of-breed solutions from dozens of vendors to help IT manager, product development teams and wireless service provider deploy the most advanced wireless LAN, IP video surveillance, MAN and WAN networks available. Its parent company, Continental Computers, has been helping businesses design and deploy customized, cost-effective network connectivity solutions since 1984.
